

April 10, 2019

Carbon Surcharge Announcement

Effective April 1, 2019 the Government of Canada has imposed a Climate Change Levy in Manitoba, New Brunswick, Ontario and Saskatchewan as part of the federal government Climate Change Plan. The Climate Change Levy will apply to all carbon-emitting fuels throughout the supply chain and will impact prices across the entire economy (fuel for transportation, energy costs for heating business places and homes, equipment purchases, maintenance tools & parts, etc.). As a result of these added new costs, Gardewine Group LP must implement a Carbon Surcharge on all shipments, effective April 15, 2019.

The Gardewine Group Carbon Surcharge for shipments with our various divisions will be as follows:

- Gardewine LTL: 1.2% of Freight Revenue
- Gardewine Deck: 1.5% of Base Revenue
- Gardewine Dedicated: 1.5% of Base Revenue
- Gardewine Bulk: 1.7% of Base Revenue

The Carbon Surcharge will show as a separate line item on all invoices.

Thank you for your understanding and continued support.
