

GARDEWINE GROUP INC.

OUR MISSION

To work together to serve our customers with the constant goal of exceeding their expectations.

Utilizing Technology to Exceed Your Expectations

Allow Our Technology to Help You Save Time & Money

In today's challenging economic times we all recognize the importance of managing the costs and effectiveness of supply chains. The traditional role of transportation service providers has evolved over the decades to the point where we are often asked to play the role of solutions providers. We are constantly working to develop new ways of providing value-added services for our clients.

In line with this, we have recently upgraded the software used to manage our business and as a result now have enhanced electronic capabilities that will assist customers to better manage their time and perform transportation analysis. In this article we want to introduce you to some of these tools and invite you to contact us to set up secure access to our website.

The first tool we want to introduce is our On-Line Tracing. Using this tool, it is now possible for customers to securely check on the status of their shipments online, 24 hours per day. The features of this system include such capabilities as downloading information to Excel spreadsheets and retrieving a copy of the signed Proof of Delivery.

When tracing a shipment you can make your request based on several different parameters including a "Fast Track" option that automatically provides information on all shipments on your account in the past week. Other tracing options allow you to select all shipments within a date range (up to 90 days), by Pronumber, by your Bill of Lading or Reference Number, or by Purchase Order Number if this information is provided to us at time of shipment. These reports can be sorted by a number of different criteria by clicking on headers at the top of the page.

Another time-saving tool available to customers is our "Detailed Shipment Report". By using this tool, Transportation Managers and Analysts will be able to download reports to Excel, thereby allowing detailed analysis of freight data such as:

General Freight

Handling and transporting freight for clients throughout Manitoba, Saskatchewan, Northern and Northwestern Ontario.

Perishables

Providing the care and attention necessary to maintain product integrity and food safety during transportation.

Northern Parcel

Providing courier, warehouse and distribution services to clients throughout Manitoba, Ontario and Saskatchewan.

Northern Deck

Providing LTL and full truckload open-deck services to clients across Canada.

Northern Logistics

Global third party logistics services provider, utilizing the assets of the Gardewine Group and its service partners.

Northern Cartage

Providing custom contract hauling within the framework of the Gardewine Group of Companies.

Northern Bulk

Specializing in the handling and transportation of bulk commodities.

- origin/destination volumes
- shipping lanes
- on-time delivery performance
- freight patterns
- freight costs.

MANUAL OF THE
GARDEWINE ONLINE TOOLS

In addition to the obvious benefits of being able to perform this analysis, these reports can be compiled and downloaded in a matter of minutes. This capability saves valuable data entry time for clients, thereby allowing more time for other management matters.

Please contact us to arrange your secure access to our website and a demonstration of how these new tools can assist you in better managing your transportation needs.

Customer Profile

Wood Wyant and Gardewine: Efficiency and Service

“Wood Wyant has been a Gardewine North customer for many years but in the recent past the volume of business transacted between our companies has grown significantly. The ability of the Gardewine Group of Companies to provide a “total transportation package” for Wood Wyant’s customers based in Manitoba & North Western Ontario is one of the primary reasons for this growth.

Gardewine North and Northern Parcel provide Wood Wyant with “one stop shopping” for all our LTL and Courier needs in this region. Using the On-Line Reporting modules saves us numerous hours while preparing quarterly transportation reports for our corporate office and the Northern Parcel On-Line Shipping System has made our Shipping Department much more productive.

I do not hesitate to recommend the Gardewine Group to anyone looking for excellent service and a true transportation solutions partner.”

Carla Melquist, Operations Manager
Wood Wyant, Winnipeg, Manitoba

WOOD WYANT

Wood Wyant’s 85 years of experience in the cleaning and sanitizing products industry has allowed them to become the leader in offering:

- Paper systems and wiping products
- Environmentally-safe cleaning and sanitizing products
- Cleaning and sanitary tools
- And electromechanical equipment
