

News Release

Gardewine Joins Climate Change Challenge With New Hybrid Vehicles

(WINNIPEG, Manitoba, October 15, 2020) Gardewine Group Limited Partnership ("Gardewine"), a leading service provider in the transportation, warehousing, and freight handling industry has announced the addition of new hybrid vehicles to their existing fleet of vehicles. "This is an exciting time in our company's evolution. The addition of hybrid vehicles to our fleet brings a new level of innovation to our services and is part of our ongoing commitment to doing our part to help face the challenge of climate change in Canada by reducing emissions as a result of finding better and more sustainable solutions" commented Mr. Darin Downey, President and Chief Operating Officer of Gardewine.

The new Ford Transit courier vans, equipped with XLH™ hybrid electric drive systems, are expected to provide a 14.0 to 21.0 percent improvement in baseline fuel economy significantly decreasing CO² emissions. The vehicles are supported by XLFleet™, a leading provider of fleet electrification solutions for class 2-6 vehicles. A Ford eQVM partner, XLFleet's™ goal is to help clients drive cleaner, greener fleet vehicles by reducing fuel consumption, saving money and helping to meet sustainability goals.

"Transportation is an essential service," added Mr. Downey, "so it feels right that our company is taking steps to reduce our environmental impact while continuing to provide the world-class service our customers have come to expect from our proud Canadian company. Today, it is possible to create positive change in the world, and we're proud to be doing our part." The new hybrid vehicles will be released for service this October.

About the Gardewine Group

Gardewine, a multi-service transportation company headquartered in Winnipeg, Manitoba is a subsidiary of Mullen Group Ltd. of Okotoks, Alberta. Gardewine has over 65 years' experience in the trucking industry, operating seven divisions – General Freight, Dedicated, Deck, Bulk, Logistics, Warehousing, and Moving & Storage – and offers a wide range of transportation, logistics, and warehousing solutions.
