Notice to Our Valued General Freight Customers:

Regarding: Swan River Washout – Update #1

Significant rainfall in Western Manitoba has resulted in a number of points along Manitoba Provincial Highways 10 and 83 being closed due to impassable water or physical washout. This disruption will force traffic to an alternative route up Provincial Highway 6 and across to Highway 10 using Highway 60.

This temporary diversion will add transit time due to extra distance travelled and congestion, and result in additional cost to move shipments between Winnipeg and Swan River (and surrounding communities). There are likely to be delays for quite some time, we encourage you to continue to visit our website for updates on any additional road closures as a result of this unfolding situation.

Accordingly, during this time all LTL shipments that are diverted via this route, which will add 204 kilometers (one-way), will be subject to a temporary Swan River Washout (SRW) surcharge of 5.08/CWT with a minimum charge of \$25.40 per shipment, to a maximum of \$1015.00 per shipment.

In addition, Gardewine asks that all customers temporarily hold shipments for the following points until further notice as they will not move to destination:

- Minitonas
- Cowan
- Pine River
- Benito
